## **REMARKS/ARGUMENTS**

### **I. Amendments to Specification**

The priority section has been amended to add status information for those applications that have issued as U.S. patents subsequent to filing of the instant application. The priority claim to U.S. Application No. 08/724,643, filed on October 1, 1996, has been withdrawn. A request for a corrected Filing Receipt to reflect this change is being submitted under separate cover.

The base number at page 158, line 13, has been corrected; the correct base number can be determined from the coding and intron regions illustrated in Figures 21C and 21E and the sequence listed in SEQ ID NO: 6. No new matter has been added.

The specification has also been amended to bring the figure references into conformity with the figure labels that are listed on the new formal drawings that are submitted herewith. The drawings in the new drawing set differ from those filed with the application in that they conform with the formal requirements of 37 C.F.R. 1.84.

None of these amendments introduce new matter.

If the Examiner has not already done so, Applicants request that the documents listed on this IDS be considered, and that the Examiner then provide Applicants with a checked-off copy of the IDS with the next communication to confirm consideration of the listed references.

A new IDS listing the documents cited in the August 19, 2004, IDS is enclosed. Copies of the other documents listed in the enclosed IDS are not enclosed, since these were
